

Statistical models

CAMBRIDGE SERIES IN STATISTICAL AND PROBABILISTIC
MATHEMATICS

Editorial Board:

R. Gill, *Department of Mathematics, Utrecht University*
B.D. Ripley, *Department of Statistics, University of Oxford*
S. Ross, *Department of Industrial Engineering, University of California, Berkeley*
M. Stein, *Department of Statistics, University of Chicago*
D. Williams, *School of Mathematical Sciences, University of Bath*

This series of high-quality upper-division textbooks and expository monographs covers all aspects of stochastic applicable mathematics. The topics range from pure and applied statistics to probability theory, operations research, optimization, and mathematical programming. The books contain clear presentations of new developments in the field and also of the state of the art in classical methods. While emphasizing rigorous treatment of theoretical methods, the books also contain applications and discussions of new techniques made possible by advances in computational practice.

Already published

1. *Bootstrap Methods and Their Application*, A.C. Davison and D.V. Hinkley
2. *Markov Chains*, J. Norris
3. *Asymptotic Statistics*, A.W. van der Vaart
4. *Wavelet Methods for Time Series Analysis*, D.B. Percival and A.T. Walden
5. *Bayesian Methods*, T. Leonard and J.S.J. Hsu
6. *Empirical Processes in M-Estimation*, S. van de Geer
7. *Numerical Methods of Statistics*, J. Monahan
8. *A User's Guide to Measure-Theoretic Probability*, D. Pollard
9. *The Estimation and Tracking of Frequency*, B.G. Quinn and E.J. Hannan
